

ReadySetGo!

readyssetgo.herokuapp.com

Easily compete against other people and teams in fitness challenges you create

The Problem

Users participate in step challenges, but do not keep their data up-to-date

Challenges Encountered

How to sync data from users with minimal overhead?

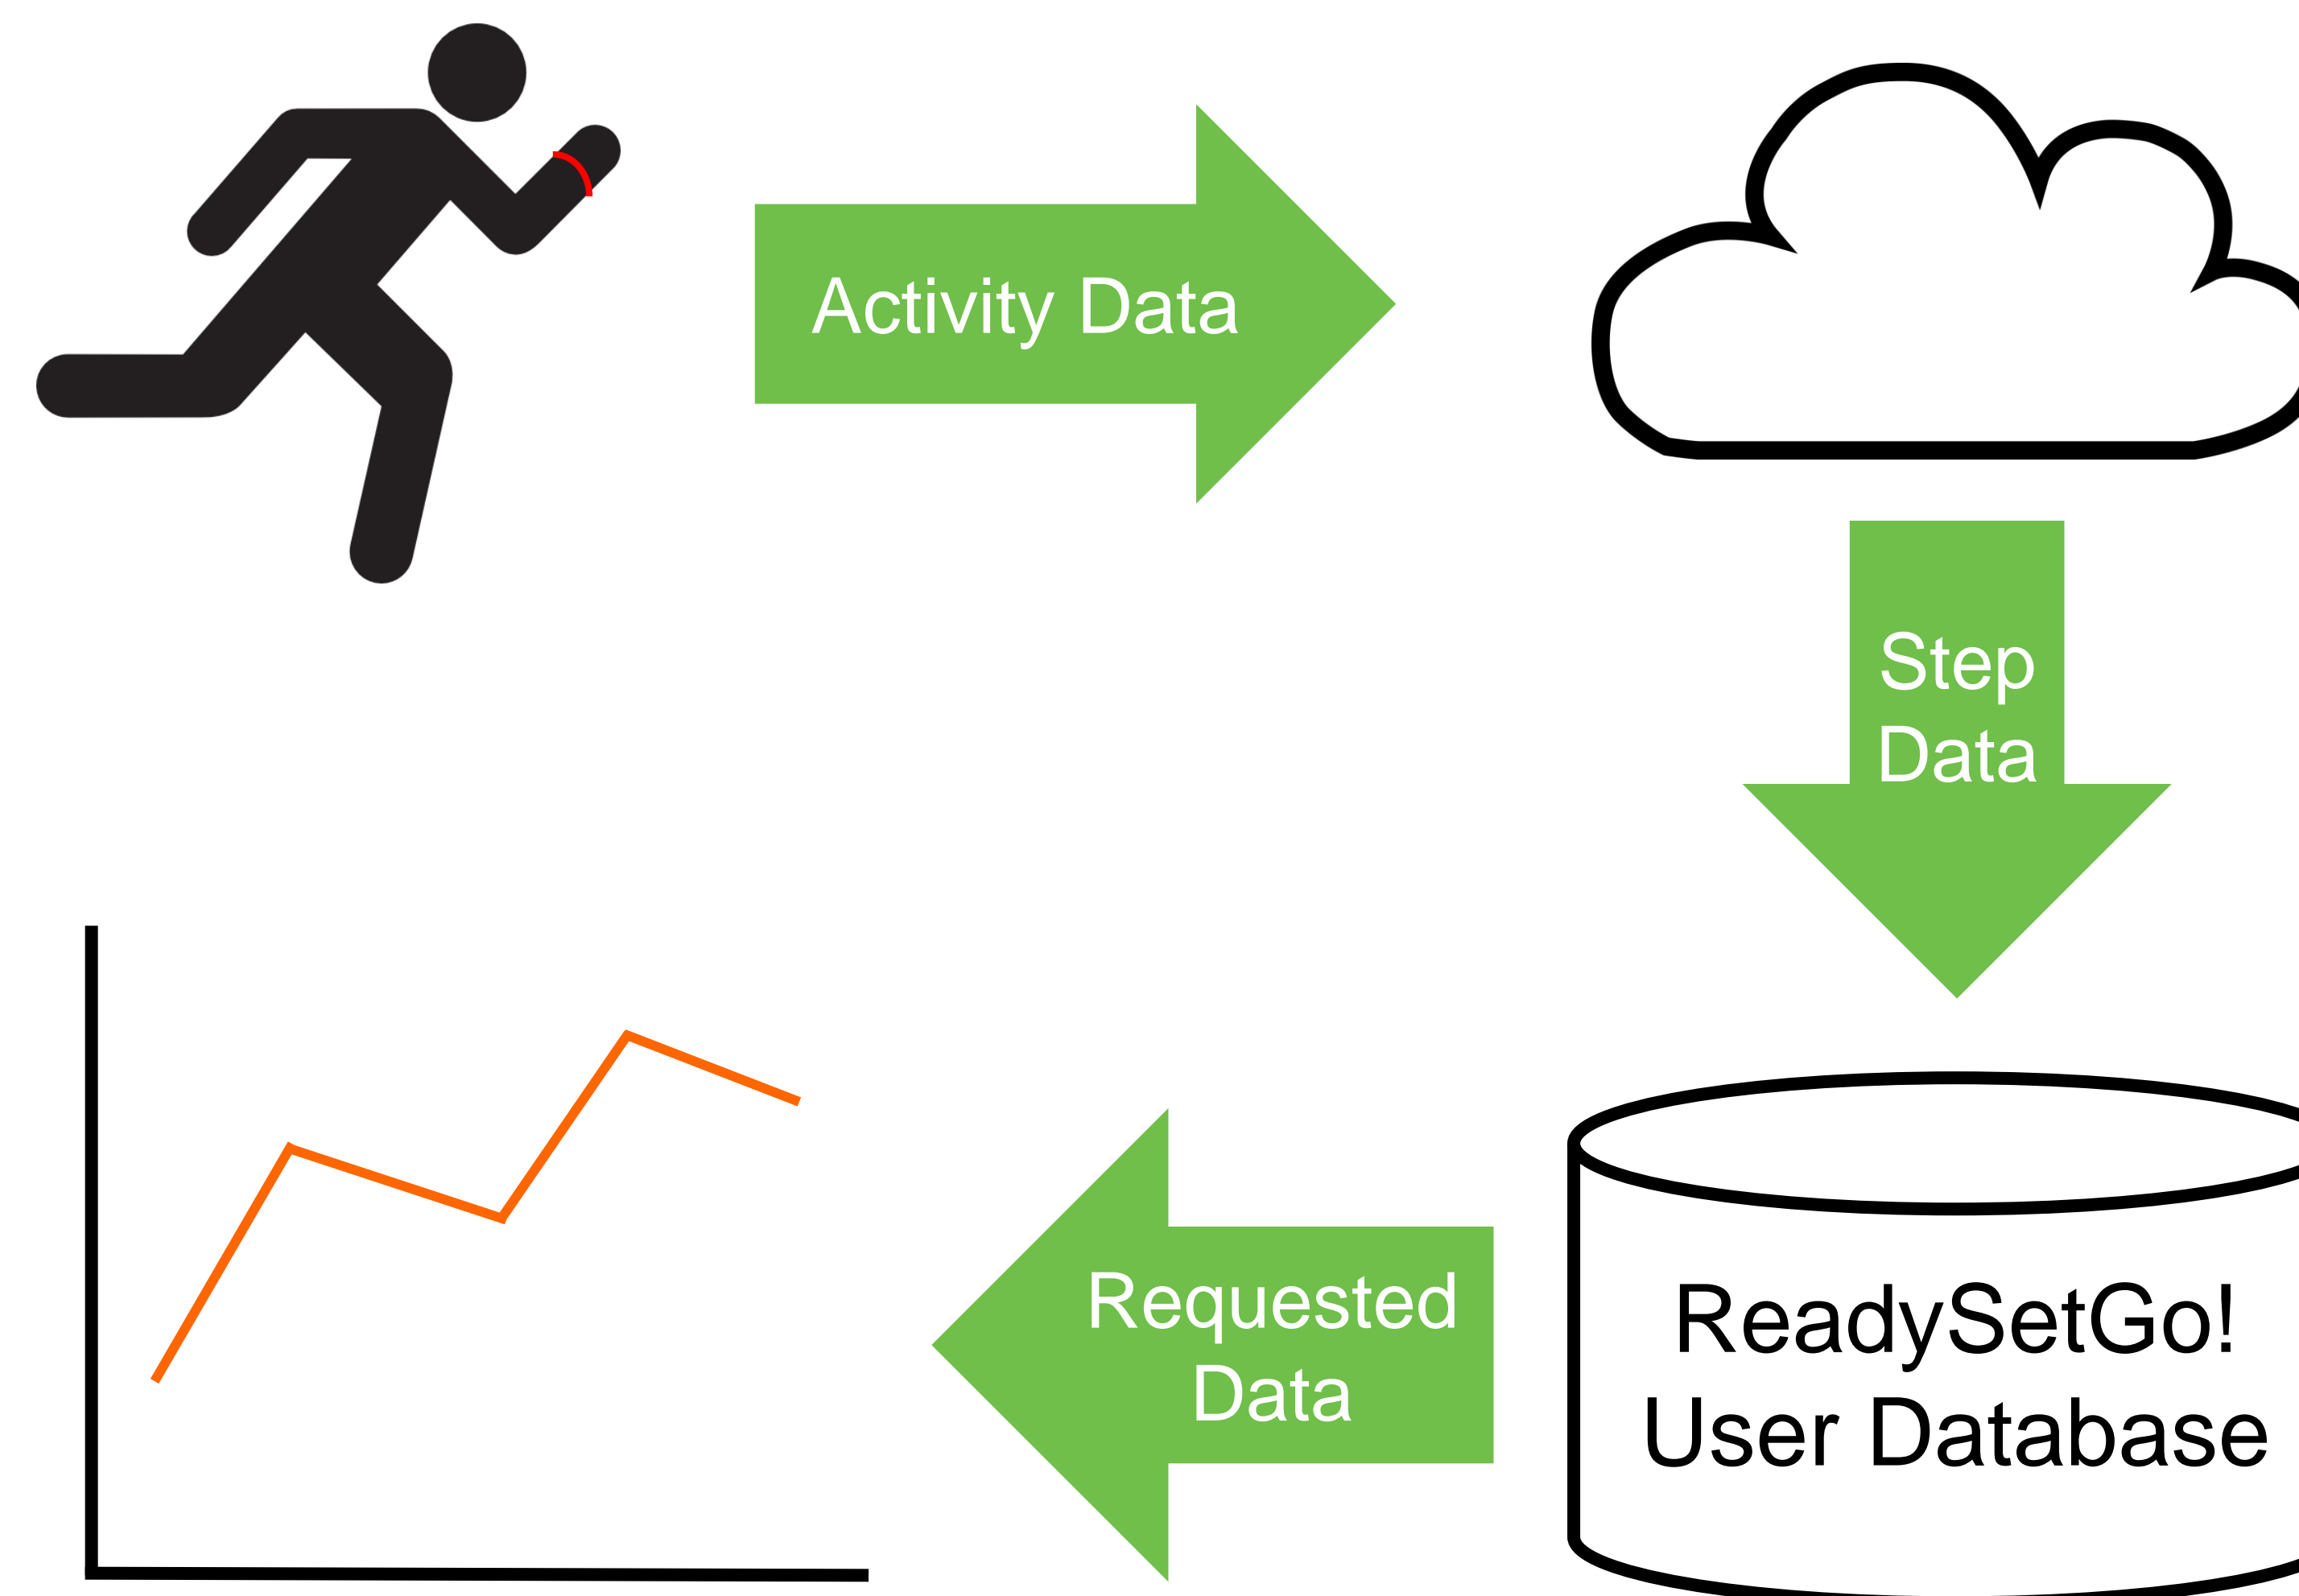

Limitations

- Data is synced every 24 hours
- Only Jawbone device supported

Our Solution

A website that:

- Supports a wearable device
- Automatically calculates and compares points
- Allows team captains to administrate teams

Future Development

Facilitate more competition by supporting more types of data to compete with.

App will be used for inter- and intra-organizational competition

Team API Connection Exception
